

RE-TRAVEL SUPPORT

My name is Elizabeth Balogun, a Radiographer from Nigeria. I applied for the 2018 travel support to Trinidad for the ISSRT 2018 world congress. I was granted and my ticket was booked as scheduled the conference came and I returned back to my country to give detailed information about the congress and its benefits.

As the country president, I have presided over two council meetings 2 general and a committee meeting on Nigerian Safe (AFROSAFE).

During this 5 meetings, I have had the opportunity to talk about the ISSRT congress which generated more interest in Nigerian Radiographers both home and abroad who have been sensitized to become associate members as well as renew their membership.

The Nigeria safe meeting also affords me the opportunity of sharing the lesson learnt during the pre-congress workshop on radiation safety with so much discussion on “Born call for Action” and Afrosafe.

The Association of Radiographers of Nigeria shall be holding her 50th annual conference which happens to be the celebration of her diamond jubilee of existence between the 21st -25th November 2018 and I shall also be presenting a paper at plenary on “Afrosafe” .

One of my many Journeys around west Africa took me to Togo which also affords me the opportunity of relaying the benefit of the travel support and the enormous gain from the ISSRT World Congress 2018

To the board of ISSRT,ASRT and all that has worked to make my Journey to Trinidad a possibility I would like to say a thank you for the Caribbean experience which I will not forget in a very long time ‘Gracias’ .

Elizabeth Balogun
President: The Association of
Radiographers of Nigeria
Nigeria, West Africa, Africa
