Current COVID-19 Transmission “Hotspots”

Hotspot: Italy

Confirmed cases in Italy

Main features of the outbreak:

- **647 confirmed cases**
- **17 deaths**
- **An initial investigation by Italian authorities has found several clusters of cases in different regions of northern Italy, with evidence of local transmission of COVID-19.**
- **There are 24 cases linked to Italy in 14 countries**
- **Press release: <http://www.euro.who.int/en/health-topics/health-emergencies/coronavirus-covid-19/news/news/2020/2/joint-who-and-ecdc-mission-in-italy-to-support-covid-19-control-and-prevention-efforts>**

Hotspot: Republic of Korea

Confirmed cases in the Republic of Korea

Main features of the outbreak:

- **2022 confirmed cases**

- **13 deaths**

- **Approximately 90% of the cases are in two areas of the Republic of Korea. Around 80% are in clusters related to religious groups in Daegu and Busan and a psychiatric hospital in Cheongdo county, Gyeongbuk Province and another, nearly 10% are in the region surrounding the capital, Seoul.**

- **The majority of the transmission to date is confined to people who were in a specific place at a specific time**

Hotspot: Islamic Republic of Iran

Confirmed cases in the Islamic Republic of Iran

Main features of the outbreak:

- 245 confirmed cases
- 26 deaths
- There are 97 cases linked to Iran in 11 countries
- A WHO team will travel to Iran to provide support

3 Shields of Protection

Protect Healthcare workers

Infection Prevention and Control (IPC) for Novel Coronavirus (COVID-19)

 Self-paced

 English

This course provides information on what facilities should be doing to be prepared to respond to a case of an emerging respiratory

[Show course details](#)

[Enroll me for this course](#)

- WHO has developed [Infection Prevention and Control \(IPC\) for Novel Coronavirus \(COVID-19\) Online course](#).

This course provides information on what facilities should be doing to be prepared to respond to a case of an emerging respiratory virus such as the novel coronavirus, how to identify a case once it occurs, and how to properly implement IPC measures to ensure there is no further transmission to HCW or to other patients and others in the healthcare facility.

- WHO developed [Psychological first aid: Guide for field workers](#). This guide covers psychological first aid which involves humane, supportive and practical help to fellow human beings suffering serious crisis events. It is written for people in a position to help others who have experienced an extremely distressing event. It gives a framework for supporting people in ways that respect their dignity, culture and abilities.

Protect Population at risk

COVID-19

COVID-19 is an infectious disease caused by a new coronavirus introduced to humans for the first time.

Protect Vulnerable countries

- WHO has been in regular and direct contact with Member States where cases have been reported. WHO is also informing other countries about the situation and providing support as requested.
- A WHO technical team is working on develop guidance for vulnerable countries preparedness for larger events.
- WHO published [interim laboratory guidance](#) for detection of the novel coronavirus. This guidance is continually updated as more data becomes available and includes advice on sample collection, diagnostic testing, and pathogen characterization. Specific interim guidance on biosafety in the laboratory has also been published.
- Stigma is harmful to people and to the outbreak response. A [guide to preventing and addressing social stigma](#) has been co-developed by WHO, IFRC and UNICEF

New recommendations

- [Report of the WHO-China Joint Mission on Coronavirus Disease 2019 \(COVID-19\)](#)
- [A Joint Statement on Tourism and COVID-19 - UNWTO and WHO Call for Responsibility and Coordination](#)
- WHO is providing guidance on early investigations, which are critical to carry out early in an outbreak of a new virus. [Several protocols are available here.](#)

A new guidance for employers on prevention of COVID-19 at workplaces was posted on WHO website: Getting your workplace ready for COVID-19

<https://www.who.int/docs/default-source/coronaviruse/getting-workplace-ready-for-covid-19.pdf>

Getting your workplace ready for #COVID19

Keep workplaces clean and hygienic

Promote regular and thorough handwashing

Promote good respiratory hygiene

Consult national travel advice before going on business travel

Advise those who are sick to stay home

#Coronavirus

Getting your workplace ready for #COVID19

Surfaces (e.g. desks and tables) and objects (e.g. telephone, keyboards) should be wiped with disinfectant regularly.

#Coronavirus

Getting your workplace ready for #COVID19

Promote regular and thorough hand washing. Put sanitizing hand rub dispensers in prominent places around the workplace and provide access to places where staff, contractors and customers can wash their hands with soap and water.

#Coronavirus
